secure their confidence, and thus be the better able to influence them. I always found them ready to listen to like teams for further transportation. me, and I effected a great deal of

I was told that a mining camp bearworst in the region. There was no semblance of law or order, every man being a law unto himself. All disputes were decided in accordance with rapidity of "draw" and accuracy of aim. I determined to go there and see if I could accomplish any reform. I was told that I would never come out of the place alive, but my idea of a at times be a real soldier, so I went to Scalp Gulch.

I found there a people who differed from other people only in this: They had drifted completely away from all restraint, I attributed this condition to the fact that there were no women in the camp, for I have observed that any body of men living without the refining influence of women will gradually sink to the level of the brute. I resolved to make my beginning with these desperate fellows by promising them that if they would reform I would return to civilization and ship them a car load of wives.

I gathered them together in a clearing, mounted a stump and made them an address. Instead of holding up their wicknedness to them simply as wickedness, I pictured their condition as entirely unfitted for the introduction of any refining influences. Their mothers would scarcely dare to come among them in their present condition. After drawing a picture of home life at which I could see a number of them were visibly affected, I expatiated on the superior delicacy of woman, her tenderness and devotion. "Now," I said at last, "there are many young women who would be glad to come here and turn your cabins into homes for you. If you will pull yourselves together, I will go and bring a number of them myself, making sure that those I select are good and true wo-

My last words produced an instantashouted from a dozen throats.

"Just as soon as you convince me that you are fitted to receive your future wives." I replied.

"Parson," said one of them, "you go long and bring the gals. We promise you to be reformed before you get

NAILS A KEY TO HEALTH

Finger Tip Diagnosis Explained by a Chicago Woman.

Mrs. Amalia Marguerite Forwerg Declares All Ills of Mankind Can Be Palmistry Should Be a Part of Ev- spondents. ery Physician's Training.

No longer need a man go to a physichan to determine if he is suffering or about to suffer from appendicitis. Inhe can quiet his conscience and pocket formed in front. All kinds of impedimell to the operating table and baffle

This was but one of the leasons that eases." Not only appendicitis, but consumption, spinal complaints, Bright's disease and every other ill of man did Mrs. Forwery tell the physicians and their nails, says the Chicago Inter Ocean.

The speaker said that every physician should have a knowledge of palmistry and that the nails alone always tallty and physical condition of the

"The thumb alone tells the history of a person," said the speaker. "There are four classes of thumb-the spatulate, square, conic and pointed. Long nalls never show such robust health as the short, broad type.

"The spatulate thumb is the square tip with the spade at the top. The person with such a thumb is practical and a good money maker, inventive, active and does not want to be housed up. The square thumb, straight at the top, denotes an orderly, orthodox, reliable, practical, emphatic character. In men it denotes a good business man,

in women, a good nurse, "The conic type is the long, narrow nail and is the nail of the artistic temperament. Musicians, actors, painters, singers and society women have this nail, and I do not like to read the hand It improperly made. Accept no counter fail of s imilar nation. Dr. L. A. Sayre mid to a lady of the hand ton (a patient):

"As you ladies will use them, its weight in gold. The motherly institute of the head of of such a person, for the characters are all alike, I do not like to read the hands of society women, for they are all the same and lack ambition. If they did not they would not be contented with their useless lot.

"The nail that is pointed like a cone belongs to the idealists of the world. They are the seers and the prophets. and all mediums have it. Inspiration does not come through the head. It comes through the long, pointed nail. People with this nall are impractical and always have to be taken care of." In diagnosing disease Mme. Forwerg

gave the following illustrations: "Appendicitis.- The top line in the wrist rises and stands up plainly, and the thumb nall looks rich. Do not wait for an attack, but have an immediste operation.

"Lockjaw.-The thumb falls in. After the patient has been operated on it straightens out. "Rheumatism.-A thin, brittle nail

and a line across the hands. "Insanity.-A long descending head line across the palm to the side on a line toward the wrist.

"Tuberculosis. - The long, narrow nnil bulbed at the end and ridged slightly. "Throat Trouble.-The big, broad

curved thumb nafl. "Paralysis.-- Nail flat and flaring at the top. "Throat, Chest and Lung Troubles .-

Long nalls. "The little red spots on the heart line in the paim tell of heart disease, but most people who think they have

heart disease are only suffering from

indigestion. "And all of this and much more can be learned just the same as dancing or French," sald she. Mrs. Forwerg urged that physicians

operate on the "thumb center of the brain" for lockjaw or paralysis. "In these cases the thumb is usually

crooked," she said, "but if the operation is successful it becomes straight."

which was then in the Union.

A Famous Saucer. Only a saucer remains of the porcelain set presented in 1783 to Martha Washington. This is carefully preserved in the Smithsonian institution at Washington. In the center appears the monogram of "M. and W.," for Martha and Washington, and about the edge is the name of every state

JAPANESE TRAITOR.

How He Betrayed Official Secrets to Russia.

STIRRING EPISODE OF THE WAR.

Arrest and Secret Court Martial of Colonei Hanzuku, Whose Treachery Upset Japan's Plan to Invade Manchuria-Shot Immediately Afterward Within the Palace Walls.

This is the story of a Japanese unitor, a Japanese Benedict Arnold, says the Tokyo correspondent of the New York Post. Since the beginning of the war it has been evident that the Russians have been supplied with an Intimate knowledge of prospective Japanese movements. The original plans of campaign were evolved in Tokyo and surrounded with great secreey. Apart from the elder statesmen and about eighteen high stuff officers no one in the empire was aware of the objective points of landing troops from which the first strike was to be made.

Soldiers were moving by thousandsentrained from all cities, embarked than the fact that Japan was carrying war to the mainland. Precautions to conceal army movements have been the most thorough in history, to the Diagnosed by Study of Natla-Says dismay of foreign and native corre-

> But the Japanese officials found that their secrets were leaking.

The First and Second army corps were to be landed high in Koren and Quotations on he Leading Products That thrown forward toward Mukden, Linoand the inside of his wrist, after which fast as troops landed the Bussians the physician's fee or else rush pell ments lay in the path of invasion. The army office at Tokyo was buffled. The first thought was that Russia's opposition and anticipation of the movement of Imperial troops was superior craft -a masteriy campaign of defense. But without feminine restraint that they Mrs. Amalia Marguerite Forwerg the idea of treachery soon replaced Chicago the other day in a little talk set out to be sure before going farther. called "Nail Reading as the First Aid Nine spies-Japanese officers disguised to Physicians In the Diagnosing of Dis- as coolles-were sent out from Tokyo. A number were ordered to work along the Transalberian railway; the others were scattered along the Yalu frontier. Every one of the nine was captured other clubwomen how to discover on speedily, unerringly, and put to death by the Russians. Without aid from Japan-description, etc.-this could not have possibly happened.

Then it was that the staff officers, and even the elder statesmen; were tend to a correct diagnosis of the men- placed under the character racking espionage of the Japanese spy system. and the land invasion had to wait. The old and later records of each individual in the secrets were overhauled and scrutinized. No one was exempted whose knowledge might have been sold to the enemy. Every man was prices, 10@15c higher. followed, dogged, watched. These methods finally seized upon certain peof Lieutenant Colonel Hanzoku of the general staff.

like a race track winner. The women spite of the advancing season. of valuable of his acquait jeweis. The Yoshuwara knew Hanzoku, and the bank of the city showed deposits in his name. All of which was not in the reach of a lieutenant colonel's salary. Hanzoku was a bard drinker, a gambler by European instincts, a frequenter of uncertain clubs and an idol of the geisha girls. He bore the distinction of introducing poker into Japan. He was, however, a graduate of a German university, a military tactician of worth and had been decorated for intrepid service during the Chino-Japanese war. On account of the latter service be held a good position on the general staff.

It has been asserted that before the withdrawal of the Russlan embassy one of the attaches arranged with Hanzoku to furnish St. Petersburg with detailed plans of Japan's purposes. The Russian attache and Hanzoku had been very friendly, having been students together in Germany. It is asserted that Hanzoku was a year ago in a very bad state financially and that he lost during a game his last piece of property.

The details of actual evidence against Hanzoku cannot be had. No word of the affair has even reached the columns of the Japanese press, but within the last few days the lieutenant colonel was arrested, tried by court martial and shot by a detachment of riflemen chosen from the Imperial guards. Between the end of the trial and the sound of the shots there were only a few hours. Hanzoku was watched over by a heavy guard and was not allowed the honor of killing himself. Moreover, he was not permitted to communicate with his family. It is said that he was executed within the palace walls and buried at the edge of the inner most.

Civilized Barbarism. Well may the exar go on his knees before the Almighty God at the thought of the ghastly war that has broken out, says the Calcutta (India) Amrita Bazar Patrika. A conflict between two such powers as Russia and Japan is likely "to stagger humanity" in a more confounding manner than the Boer war did. They talk of the superior civilization of Europe. It is, in fact, the worst form of barbarism that the world has ever seen.

Japanese Confidence.

The Japanese believe in themselves, says a writer in April World's Work. They have gone into war with Russia. expecting to win. Self reliance marks the Japanese in all relations of life. It is a quality which makes for their suc cess. "They can, because they think they can." Aggression and insult the Japanese have always been quick to resent. China time out of mind has been treated like a conquered province

IN BOSTON MARKETS.

Are in Demand.

Boston, April 27.—Butter is steady in the local dairy market and there is a fair demand both for fresh creamery and storage stock. Other grades are a trifle slower. Receipts are far below those of last year.
